

JT Somwaru

AI Implementation Lead & Automation Architect

New York, NY · jsomwarux@yahoo.com · linkedin.com/in/jtsomwaru · github.com/jsomwarux

PROFESSIONAL SUMMARY

Business Systems Analyst with 6 years at Spectrum Enterprise / Charter Communications, now designing and deploying AI automation systems through Opticfy. Bridges the gap between business operations and agentic AI — configuring Salesforce Agentforce, building multi-agent orchestration pipelines, and shipping production AI tools via AI-directed development. Rare profile: deep enterprise BSA experience combined with hands-on AI agent orchestration, responsible AI practices, and a track record of building and delivering working AI systems.

CORE COMPETENCIES

Multi-Agent Orchestration · Salesforce Agentforce · n8n Workflow Automation · AI Systems Architecture · Business Systems Analysis · Responsible AI Practices · LLM Integration (Claude · GPT · Gemini · Grok) · Prompt Engineering · RAG Pipeline Design · AI-Directed Development · Stakeholder Management · Requirements Gathering & Specification

PROFESSIONAL EXPERIENCE

Founder & AI Automation Consultant

Opticfy · New York, NY · 2025 – Present

- **Designed a 4-stage multi-agent delivery pipeline** — Research Agent → n8n Workflow Builder → Presentation Agent → Production Builder — standardizing AI consulting handoffs from prospect research through production deployment.
- **Delivered construction progress tracking dashboard** for Aya (\$1,500 engagement) — automated field input collection, AI-powered status summarization, and stakeholder reporting pipeline.
- **Built and operate a 10-agent autonomous operations stack**: market intelligence monitors, job market scanners, crypto portfolio analysis with game-theoretic scoring, health tracking, and automated backup systems — demonstrating AI infrastructure design at production scale.
- **Developed 4-LLM cross-validation ensemble methodology** (Claude + GPT + Gemini + Grok) for high-confidence AI analysis, deployed in Nash Satoshi rankings platform.
- **Implemented responsible AI practices** across all deployments: human oversight checkpoints, automated confidence scoring, decision logging, and AI explainability reporting.
- **Shipped iOS app** (Vista — movie taste profiles) and **web platform** (Glow Index — skincare rankings) via AI-directed development using Claude Code and specialized coding agents.

Business Systems Analyst

Spectrum Enterprise / Charter Communications · New York, NY · 2019 – 2025

- **Led product catalog configuration and system implementations** across Salesforce and enterprise platforms for a Fortune 100 telecom serving enterprise clients.
- **Translated complex business requirements** into technical specifications for cross-functional engineering, product, and operations teams — serving as the primary business-to-technology bridge.
- **Coordinated multi-stakeholder implementation projects** end-to-end: requirements gathering, scoping, configuration, QA, deployment, and ongoing iteration.
- **Managed ongoing system configuration and quality assurance** for enterprise-grade production systems with direct impact on revenue-generating product catalog.
- **Established credibility** across both business operations (stakeholder language) and technical implementation (specification depth) — the foundation of the Opticfy consulting model.

SALESFORCE AGENTFORCE DEPLOYMENTS

Employee Assistant — Internal Agentforce Agent

InternalCopilot · 3 Topics · 7 Actions · 2025

- Configured full Agentforce agent in Agent Builder UI: topic definitions, action mappings, channel configuration, and GenAIPlanner orchestration.
- Designed conversational flows for internal workforce automation — routing, lookup, and self-service capabilities across HR and operations use cases.

Ecommerce Service Agent — Customer-Facing Agentforce Agent

ExternalCopilot · 2025

- Deployed external-facing Agentforce agent for customer service automation — order management, product inquiry, and escalation routing.
- Managed full deployment lifecycle via SFDX-directed process, Salesforce Flows integration, and Agent Builder configuration.

AI PRODUCTS & SYSTEMS

Nash Satoshi — Crypto Game Theory Rankings Platform

4-LLM cross-validation ensemble (Claude, GPT, Gemini, Grok) producing consensus game-theoretic token analysis. Leaderboard + individual scorecards. Methodology expandable to skincare, consumer products, college, and neighborhood rankings.

Mission Control — AI Operations Dashboard

Always-on Next.js + Convex dashboard for agent monitoring, task management (Kanban), cost tracking, and deployment audit trail. Runs via launchd agents — zero manual restarts required.

Vista — iOS Movie Rating & Taste Profile App

AI-directed iOS app with taste profiling, performer rankings, and 30-day trending analysis. Pending App Store review.

Glow Index — Skincare Rankings Platform

Consumer product rankings platform using structured AI analysis. Deployed and live.

TECHNICAL SKILLS

AI Agents & Orchestration

Salesforce Agentforce, n8n (4-LLM ensemble patterns), multi-agent pipeline design, RAG pipeline architecture, prompt engineering (advanced — XML tagging, multi-shot, chain-of-thought)

LLM APIs

Anthropic Claude (4.6), OpenAI GPT, Google Gemini, xAI Grok — integration, chaining, ensemble cross-validation

Development

Python (automation, data processing, API scripting), TypeScript/JavaScript (AI-directed), Git / GitHub, Next.js, SQLite

Salesforce

Agentforce Agent Builder, Salesforce Flows, data model (Account, Contact, Case, Opportunity, Order), SFDX-directed deployment

Tools & Platforms

Claude Code, Firecrawl, Brave Search API, Dexscreener API, Google Drive API, Convex, LaunchAgents (macOS automation)

Methodologies

AI-directed development, responsible AI practices, business process automation, multi-stakeholder implementation, requirements specification
